INSURANCE
MATHEMATICS & ECONOMICS

Author index Volume 17

Alegre, A. and **M.M. Claramunt**, Allocation of solvency cost in group annuities: Actuarial principles and cooperative game theory 19– 34

Christ, R. and **J. Steinebach**, Estimating the adjustment coefficient in an ARMA(p, q) risk model 149–161
Claramunt, M.M., see **Alegre, A.** 19– 34

Deelstra, G. and **F. Delbaen**, Long-term returns in stochastic interest rate models 163–169
Delbaen, F., see **Deelstra, G.** 163–169

Haberman, S., see **Renshaw, A.E.** 1–17
Hesselager, O., A unification of some order relations 223–224
Hesselager, O., see **Kaas, R.** 193–201

Kaas, R. and **O. Hesselager**, Ordering claim size distributions and mixed Poisson probabilities 193–201

Machnes, Y., Deductible insurance and production 119–123
Mandl, P. and **L. Mazurová**, Harmonic analysis of pension funding methods 203–214
Mazurová, L., see **Mandl, P.** 203–214

Møller, C.M., A counting process approach to stochastic interest 181–192
Müller, A., Orderings of risks: A comparative study via stop-loss transforms 215–222

Norberg, R., Differential equations for moments of present values in life insurance 171–180

Paulsen, J., Optimal per claim deductibility in insurance with the possibility of risky investments 133–147
Powers, M.R., A theory of risk, return and solvency 101–118
Puzey, A.S., A reappraisal of the principle underlying the conventional actuarial estimator of q_x 125–132

Renshaw, A.E. and **S. Haberman**, On the graduations associated with a multiple state model for permanent health insurance 1– 17

Steinebach, J., see **Christ, R.** 149–161

Wang, S., Insurance pricing and increased limits ratemaking by proportional hazards transforms 43– 54
Wang, S., On two-sided compound binomial distributions 35– 41
